

csmf::Fracture::Analytical
Aperture

csmf::Fracture::Analytical
Pressure

csmf::Fracture::Analytical
Length

```
graph LR; A[csmf::Fracture::Analytical Aperture] --> C[csmf::Fracture::Analytical Length]; B[csmf::Fracture::Analytical Pressure] --> C;
```

The diagram illustrates a data flow where two input variables, 'csmf::Fracture::Analytical Aperture' and 'csmf::Fracture::Analytical Pressure', are combined to determine the value of 'csmf::Fracture::Analytical Length'. The input boxes are white with black borders, while the output box is shaded gray with a black border. Blue arrows indicate the direction of the flow from the inputs to the output.
