

csmp::Model::Initialize

csmp::Model::Initialize

csmp::Model::UpdateSubdomain
PropertyStorage

```
graph LR; A[csmp::Model::Initialize] --> C[csmp::Model::UpdateSubdomain PropertyStorage]; B[csmp::Model::Initialize] --> C;
```

The diagram illustrates a flow where two separate 'csmp::Model::Initialize' operations lead to a single 'csmp::Model::UpdateSubdomain PropertyStorage' operation. The source boxes are white with black borders, while the destination box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
