

csmplib::LinearElasticity
_Example::Run

csmplib::MechanicsAndMultiphase
Flow_Example::Run

csmplib::StressesAndStrains
< 2U >::PlaneStress

```
graph LR; A[csmplib::LinearElasticity_Example::Run] --> C[csmplib::StressesAndStrains< 2U >::PlaneStress]; B[csmplib::MechanicsAndMultiphaseFlow_Example::Run] --> C;
```

The diagram illustrates a dependency or data flow. Two separate boxes on the left, representing different example classes, have arrows pointing to a single box on the right. The top box is labeled 'csmplib::LinearElasticity_Example::Run' and the bottom box is labeled 'csmplib::MechanicsAndMultiphaseFlow_Example::Run'. Both arrows point to a box on the right labeled 'csmplib::StressesAndStrains< 2U >::PlaneStress'. The box on the right is shaded gray, while the boxes on the left are white with black borders.
