

csmp::readTextPixelData

csmp::Triangulator
_Example::Run

csmp::Triangulator
::TrianglesFromRegularGrid

```
graph LR; A[csmp::readTextPixelData] --> C[csmp::Triangulator::TrianglesFromRegularGrid]; B[csmp::Triangulator_Example::Run] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two separate boxes. The top box contains the text 'csmp::readTextPixelData'. The bottom box contains the text 'csmp::Triangulator' followed by '_Example::Run' on a new line. On the right, there is a single, larger box with a gray background. It contains the text 'csmp::Triangulator' followed by '::TrianglesFromRegularGrid' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions on the left are related to or feed into the function on the right.
