

`csmp::computeGasFlowProperties`

```
graph LR; A[csmp::computeGasFlowProperties] --> B[csmp::makeScalar]; A --> C[csmp::ScalarVariable::operator()];
```

The diagram illustrates two function calls originating from `csmp::computeGasFlowProperties`. Two blue arrows point from the right side of the grey box to the two separate white boxes on the right.

`csmp::makeScalar`

`csmp::ScalarVariable
::operator()`
