

csmc::chooseValidAndPreferably
FirstEdge

csmc::chooseValidAndPreferably
SecondEdge

csmc::chooseValidAndShortest
OrBiggerSolidAngleEdge

csmc::dihedralDegAngle

```
graph LR; A[csmc::chooseValidAndPreferably FirstEdge] --> D[csmc::dihedralDegAngle]; B[csmc::chooseValidAndPreferably SecondEdge] --> D; C[csmc::chooseValidAndShortest OrBiggerSolidAngleEdge] --> D;
```

The diagram illustrates a flow from three source boxes on the left to a single target box on the right. The source boxes are labeled 'csmc::chooseValidAndPreferably FirstEdge', 'csmc::chooseValidAndPreferably SecondEdge', and 'csmc::chooseValidAndShortest OrBiggerSolidAngleEdge'. The target box is labeled 'csmc::dihedralDegAngle'. Blue arrows point from each source box to the target box.
